Dynamic Defense (RESTARTS SEPTEMBER 12th)

This course is designed for students who have been playing for several years. While we will certainly review standard leads, signaling, and second and third hand play, the material here will go far beyond the basics, focusing also on an examination of the exceptions to the rules (guidelines). Emphasis will be placed on bridge logic: Drawing inferences from the auction and partner's lead and changing your plan based on declarer's subsequent play. Special emphasis will be placed on counting out the distribution of the hands and placing the high card points.
