Developing “Card Sense”-A fresh approach to declarer play.

Do some people manage to win more tricks than you do?

This course is designed to improve your card sense, your ability to see how to look at all four suits and be able to work out how many tricks that suit will yield. You will also learn to understand the flip side, how many tricks the defenders are threatening to win in a given suit.

Entries, hold-ups, finessing for two or even three missing honors, the three basic methods of establishing tricks in no-trump, and all the other methods available to you when there is a trump suit, will all be topics covered. Additionally we will look at how the defender's opening lead strategies are different in trump versus no trump contracts.

Work on card combinations and safety plays will round out the course.
